

Khaled Saayda

+972568367403 | k.saayda@student.aaup.edu | [LinkedIn](#) | Junior AI/ML Engineer

PROFESSIONAL SUMMARY

Junior AI/ML Engineer with a strong foundation in machine learning, deep learning, and cloud computing, gained through advanced training programs, international academic experience, and real-world projects. Proven ability to build predictive models and lead technical training sessions for 30+ students, with hands-on skills in Python, TensorFlow, and AWS.

EDUCATION & CERTIFICATIONS

Oct 2021 – July 2025	AAUP Jenin, Palestine Bachelor of Science in Computer Science, GPA (3.7/4) Excellent
Feb 2025 – June 2025	Udacity Nanodegree program 4th Cohort Scholarship (Nano Degree) in Intro to Machine Learning with TensorFlow
Oct 2024 – Feb 2025	Udacity Nanodegree program 3rd Cohort Scholarship (Nano Degree) in AI Programming with Python and TensorFlow
Oct 2024 – Jan 2025	AI for Sustainable Development Training by USAID, PSD Advanced AI and Machine Learning Training
Jan 2023 – May 2023	University of Bradford United Kingdom, Bradford Erasmus+ Exchange Student

EXPERIENCE

Mar 2025 – Present	AWS Lead Program by Gaza Sky Geeks Trainer AAUP IT Club Trained to lead and deliver an AWS Bootcamp for 30+ students, totaling 16+ hours, aimed at preparing participants for the AWS Certified Cloud Practitioner exam.
Oct 2024 – Present	Event Manager AAUP IT Club Planned and coordinated 10+ events efficiently, managing logistics and resources to ensure smooth execution and successfully achieve event goals.
Oct 2024 – Present	Problem-Solving Trainer AAUP IT Club Led a 9-week training for 30+ students, delivering 40+ hours focused on algorithms, programming, and competitive strategies. And designed 12 coding challenges to reinforce key algorithmic concepts on platforms like Codeforces.

SKILLS

- | | |
|--|--|
| •Programming Languages: Python, C++, C#, Java, SQL | •Frameworks & Libraries: TensorFlow, Keras, Pandas, NumPy, |
| Matplotlib, Seaborn, Scikit-learn | •Tools & Platforms: AWS, Git, Jupyter, Colab, Linux, Bash, MySQL |

PROJECTS

Image Classification Application using Deep Learning

Technologies: Python, TensorFlow, Keras, NumPy, Pandas, Matplotlib, Jupyter Notebook

- Developed an image classifier using TensorFlow and Keras with transfer learning on the Oxford Flowers 102 dataset, including a full data pipeline for preprocessing and proper train/validation/test splits.
- Built a CLI for predictions with probability scores, evaluated performance with accuracy/loss metrics, and visualized results using Matplotlib.

Donor Prediction System for Targeted Charity Outreach

Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Built a supervised machine learning model to predict likely donors using demographic and income data; implemented data preprocessing, one-hot encoding, and grid search tuning across models including Decision Trees, SVM, and Random Forests.
- Conducted data analysis and feature importance evaluation, developed a full ML pipeline, and presented insights to support cost-efficient targeting strategies for a nonprofit organization.
